**TANK**

**TANK M**

**TANK S**

**POSITIONING**

Larger, more durable commercial ZTR design than the Commercial Z-Force. Improves traction and includes features that keep operators comfortable when mowing all day. Delivers improved efficiency and quality of cut with heavy-duty slope-nosed fabricated deck.

Full-size commercial mower designed with features to fit the many varied employees and grass types encountered by those serious commercial, institutional or municipal contractors.

Revolutionary zero-turn mower with steering wheel and dual foot pedal operation for full directional control of the front wheels, unlike free-rotating front casters of standard zero-turns. More stability, maneuverability and easy operation add up to a more confident and productive operator. Available in diesel and liquid propane options.

**TARGETED APPLICATIONS/USER**

New or smaller commercial or institutional contractor

Large commercial or institutional contractor

Institutional or municipal contractor and large commercial cutters with regular new hiring of employees and demanding applications

**TERRAIN**

Flat and large areas

Slight slopes and large areas

Challenging hills and large areas
