

## SPRAYER EXCLUSIVE FEATURES

### Hopper Construction

80- and 125-lb capable hoppers made from injection-molded polyethylene for extended life and ruggedness that the professional landscaper requires

### Premium Kawasaki® Engines

For longer life and performance needed for any type of job

### Pumps

Flo-Jet™ (12VDC) commercial- grade pump that provides a flow of liquid and pressure settings with ranges of 4.8 gpm @ 40 psi

### Spray Booms

Foldable rear spray booms with 5 dripless nozzles that provide an effective spray width of 10 ft.

### Sprayer Controls (TANK Spreader / Sprayer)

Offers the capability of operating the control valves for right, center, left or a full-spray pattern at the touch of a lever

### Rear Wheel Drive (TANK Sprayer)

Increases traction on all turf conditions; the wide track design also gives stability

### Lap Bar Operated Controls (TANK Sprayer)

The lap bar control arms feature separate push button activation of the sprayer and spreader motors for on/off capabilities as needed

### Foot Controls

Easy-to-use, foot-operated pedal for opening and closing the granular hopper

### Drive System

Kanzaki pumps and White® wheel motors (TANK Spreader/Sprayer) gives a smooth and controlled speed that will help apply an even flow of material in all terrain

### Non-Corrosive Construction

The manifold is made from PVC with an in-line stainless steel mesh strainer and see-through bowl, which keeps the unit easy to maintain

### Ground Clearance

A high ground clearance helps when operating the unit over rough terrain (TANK Spreader/Sprayer)
