

THE TANK™ S EXCLUSIVE FEATURES

Commercial-Grade Kawasaki® Engines

Choose from 31 or 37 hp* Kawasaki V-twin engines for premium performance and longevity

*as rated by engine manufacturer

Productivity Package

Features premium adjustable suspension seat w/lumbar support and adjustable arm rests, seat back recline and suspension stiffness to match operator preference; means less breaks and more productivity

Remote Cooling System

For increased hydraulic fluid life to the pumps and wheel motors

Select Cut System™ Deck

This innovative deck design features a patented sloped-nose skirt with an adjustable leading edge and a configurable inner baffle that allow you to cut any type of grass on any terrain

Synchro Steer™ Technology

Patented 4-wheel steering, gives the operator full directional control of the front wheels, unlike free-rotating front casters of standard zero-turns; this gives the TANK S full stability on hillsides – even on steep areas that previously required a walk-behind; Synchro Steer technology also allows the TANK S to make true zero-degree turns and tight maneuvers around any obstacles, while virtually eliminating the potential for turf damage

Simple to Operate

Even an inexperienced operator can safely and confidently operate the TANK S; intuitive controls like a fully adjustable steering wheel with power steering and forward and reverse foot pedals

3-Way Adjustable Steering Column

Fits the comfort level required by any operator

Hydraulic Power Deck Lift

Single lever control for easy access and function

Pivoting Front Axle

Follows the contours of the ground for superior cutting, providing a smoother, more uniform look and versatility for different terrains
