## A TILLER FOR EVERY GARDEN.

A tiller has to dish out a beating without taking one in return. So as it's overturning dirt to clear the way for your garden, you can be sure that the Cub Cadet line of tillers will always deliver. Making even the toughest job enjoyable.

SMARTER FEATURES FOR A BETTER EXPERIENCE. THAT'S THE **CUB CADET ADVANTAGE.**

### SUPERIOR GROUND BREAKING

With 13" dual-direction, self-sharpening tines (on select models), Cub tillers provide exceptional cultivating and seedbed preparation in any soil.

### COVERS MORE GROUND

Cub Cadet offers a full range of tiller widths from as small as 6 – 12" for a small flower bed to 18" for a full garden. You'll be able to get the job done as fast as you need, no matter the size.

### EASY TO USE

Single-hand operation (on select models) lets you stand to the side and steer the tiller with one hand so you do not have to walk in your freshly tilled soil. And an adjustable, vertical handle is a simple way to set your height.

## WHICH TILLER IS RIGHT FOR YOU?

Different sized gardens call for different kinds of tillers. That's why Cub Cadet offers a full line of tillers to suit your garden, no matter the size. Whether you're just starting to garden or you've been doing it for years, you'll be able to cultivate rich soil so that your plants can thrive.

### FRONT-TINE TILLERS

- Ideal for smaller garden space.
- Tines are mounted in the front and provide traction.
- Power reverse backs unit up at end of row.

#### FORWARD-ROTATING TINES

- Preparing flower beds in the spring.
- Maintaining gardens throughout the growing season.
- Turning under vegetation and compost in the fall.

### REAR-TINE TILLERS

- Works well for virtually any garden task.
- Tines are mounted behind the drive wheels for better traction and balance.
- Easy and smooth operation; even in small places.

#### COUNTER-ROTATING TINES

- Specifically designed for breaking new ground.
- Digs faster and deeper.
- Can power through hard-packed soil even in the most challenging conditions.

#### DUAL-DIRECTION TINES

- Combines the best of both forward and counter rotating.
- Can break new ground but also has the ability to maintain existing beds.
- Turns under vegetation and compost.
