## OPTIONAL ACCESSORIES

15,000 BTU HEATER

OVERHEAD CONSOLE

REAR-VIEW  
AND SIDE MIRRORS

STROBE LIGHT –  
BOLT-ON OR MAGNETIC

ROTATING BEACON

STEREO MOUNT

FRONT & REAR  
WORK LIGHTS

DOME LIGHT

BACK-UP ALARM

HORN KIT

SWITCH PANEL

REAR PANEL

BEYOND THE EXPECTED.™

## FOR YEAR-ROUND PRODUCTIVITY.

The Cub Cadet Yanmar® hard cabs are designed to not only complement the tractors' function, but also their appearance. These compact cabs all come with standard features, such as windshield wipers, hard doors, soft rear panels, vented front windshield and quick-detach doors. And for good measure, we've also thrown in a few extra useful accessories.

### STEEL DOORS W/FIXED GLASS

Allow for a tighter seal over fabric door construction and provide better climate control.

### FRONT WINDSHIELD W/TEMPERED GLASS

Allows for longer glass life and better performance from the wiper assembly with less window flex.

### STEEL-CONSTRUCTED ROOF

Lined with a fabric headliner to help reduce drivetrain noise and increase operator comfort and overall appearance.

### SOFT REAR PANEL

This removable panel makes the opening of the cab easier in warmer conditions.  
(Optional hard rear panel also available.)

### STANDARD FRONT WINDSHIELD WIPER

This standard option with single speed will allow for clearer sight lines in adverse conditions.

## Specifications

### SB45

Application	Sc2400
Overall length	41.5"
Overall height	42.5"
Cutting width	45"
Cutting depth	21.9"
Auger diameter	16"
Impeller fan diameter	16"
Chute rotation	225°
Discharge chute diameter	6"
Maximum lift height	11.5"
Park stand	Pin-able
Weight	227 lbs.

### FB60

Application	Sc2400
Cutting depth	5"
Reversible cutting edge	Standard
Cutting thickness	0.25"
Adjustable skid shoes	Standard
Cutting width (straight)	60"
Angle range	30°
Cutting width (at 30° angle)	51"
Hydraulic angle	Standard
Cutting edge height	3"
Ramp angle	15°
Blade lift height	11"
Overall blade height	19.5"
Trip springs	Dual
Weight	220 lbs.

### FB72

Application	Ex2900/Ex3200
Cutting depth	4.5"
Reversible cutting edge	Standard
Cutting thickness	0.25"
Adjustable skid shoes	Standard
Cutting width (straight)	72"
Angle range	30°
Cutting width (at 30° angle)	62.5"
Hydraulic angle	Standard
Cutting edge height	3"
Ramp angle	18°
Blade lift height	11"
Overall blade height	19.5"
Trip springs	Dual
Weight	275 lbs.

## SNOWBLOWER

The SB45 was designed for moderate to deep snow application. Its 45" wide and 21.9" deep cutting depth gives a wide, deep path in heavy snowfall conditions. Power is delivered by the PTO and the final drive is delivered through a #50 chain and sprockets – both built to handle heavy snowfalls.

### WIDE 45" HOUSING

Designed to make a wide 45" clearing path – an additional 5" wider than the tractor wheels.

### REINFORCED AUGERS

Steel rods are welded to both the augers and the auger mounting shaft making them stronger in heavy snow and frozen conditions.

### PTO DRIVEN

Power is delivered through the tractors mid-PTO, delivering smooth, consistent power.

### #50 CHAIN FINAL DRIVE

Heavy-duty #50 chain delivers stronger, more reliable horsepower for longer life.

### QUICKATTACH™ HITCH

Ensures a fast fit and removal of snow blower.

## DOZER BLADE

The FB60 and FB72 make the Sc2400, Ex2900 or Ex3200 an even more versatile machine. The heavy-duty 60" or 72" blade, with standard power angle and down pressure, makes plowing packed snow or grading your property fast and easy. The heavy-duty mold board, with reversible cutting edge, provides longer life. The QUICKATTACH™ hitch assembly comes standard.

### HEAVY-DUTY MOLDBOARD

Provides increased durability in all working conditions.

### REVERSIBLE CUTTING EDGE

1/4" thick carbon ensures longer blade life.

### HYDRAULIC POWER ANGLE

Gives the operator smooth, precise control.

### POWER DOWN PRESSURE

Allows the blade to dig into the ground to loosen packed snow or hard dirt.

### QUICKATTACH™ HITCH

Makes attaching and detaching fast and easy.

## HARD CAB

The HC100 and HC300 are a valuable addition to the Cub Cadet Yanmar® compact tractor. Their heavy-duty construction keeps the cold out to increase productivity during harsh conditions.
