# Li-ION BATTERY

## PUT MORE POWER AT YOUR FINGERTIPS.

When working with handheld power tools, power and performance are a priority. A longer run time means more work can get done. That's why Cub Cadet's line of high-performance handheld equipment with Lithium Ion batteries lasts three times longer than traditional nickel-cadmium battery powered handhelds — making it perfect for almost every yard task. The 20-volt Lithium-Ion long-use battery lasts so it won't slack when it's needed for long projects. Plus, it'll last for up to six times more charge/discharge cycles.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE. THAT'S THE **CUB CADET ADVANTAGE.**

### LITHIUM-ION HEDGE TRIMMER

The 22" precision-sharpened steel blades offer extended reach and even cutting, while dual-action blades cut branches faster. A three-sided comfort handle provides a larger gripping area for ultimate comfort and control.

### LITHIUM-ION BLOWER

For a blast of power, turn to the blower that produces up to 100 MPH and 135 CFM. A balanced and lightweight design provides easy use and handling, while a two-speed switch lets the user adjust speed to match the task.

### LITHIUM-ION CHAINSAW

As the chainsaw comes fully assembled in the carton, you can get to work right away. And there's no slowing you down, thanks to an automatic oiler. Safety always comes first, with a trigger lock and standard hand guard.

### LITHIUM-ION POLE SAW

With an 8" bar length and lightweight design, you enjoy easy use and handling. A collapsible pole extends to trim branches from five to eight feet, while a soft-touch rubber grip reduces vibration.

### LITHIUM-ION POWERED TRIMMER

This straight-shaft trimmer offers an easy reach under shrubs and trees, as well as right- and left-handed use. A 12" cutting swath, auto release and continuous operation mean this trimmer can trim time off your to-do list. A touch of the indicator button lets the user know how much of the battery charge is left, and because the battery and charger are included, buying this trimmer will allow you to power the other handheld tools.
